PROFESSIONAL EXPERIENCE

Infrastructure Engineer, Tata Consultancy Services (TCS) Aug 2024 – Present

Mumbai

- Administer a 1000+ VM RHEL 8/9 environment, managing user/group permissions, LVM storage, and systemd services across physical and virtual hosts.
- Harden systems using SELinux policies, firewalld rules, and Qualys-driven vulnerability remediation across 1000+ endpoints to maintain security compliance.
- Build and maintain Ansible playbooks for passwordless SSH configuration, quarterly patch cycles, and vulnerability remediation, replacing manual server-by-server work across the fleet.
- Support OpenShift platform operations, diagnosing production issues and coordinating server migrations with structured rollback plans.
- Manage YUM/DNF-based software repositories and enforce package governance across the environment.
- Perform root-cause troubleshooting for production incidents, restoring service quickly and documenting fixes for the team.
